### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/13/09 has been entered.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-36, 38-69, 76-78,80,84,93-96, 123-125 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1,3-46 of copending Application No. 10/752,438. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is clear that

Art Unit: 3733

all the elements of claims of the application are to found in claims of the '438 application. The difference claims of the application and claims of the '438 application lies in the fact that the '438 application claims include many more elements and are thus much more specific. Thus the invention of claims of the '438 application is in effect a "species" of the "generic" invention of claims of the application. It has been held that the generic invention is "anticipated" by the "species". See in re Goodman, 29 USPQ2d 2010 (Fed. Cir. 1993). Since claims of the application are anticipated by claims of the '438 application, they are not patentably distinct.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-36, 38-69, 76-78,80,84,93-96, 123-125 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1,3, 8,9,11-17,20,42,51,96-137 of copending Application No. 10/681,750.

Although the conflicting claims are not identical, they are not patentably distinct from each other because it is clear that all the elements of claims of the application are to found in claims of the '750 application. The difference claims of the application and claims of the '750 application lies in the fact that the '750 application claims include many more elements and are thus much more specific. Thus the invention of claims of the '750 application is in effect a "species" of the "generic" invention of claims of the application. It has been held that the generic invention is "anticipated" by the "species". See in re Goodman, 29 USPQ2d 2010 (Fed. Cir. 1993). Since claims of the application are anticipated by claims of the '438 application, they are not patentably distinct.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Response to Arguments***

Applicant's arguments with respect to claims 1-36, 69, 76-78,80,84,93-96,123-125 have been considered but are moot in view of the new ground(s) of rejection.
